# MARKET SNAPSHOT

## Q1 2020

### NEW LISTINGS

---

New Listings in the first quarter showed declining numbers as compared to 1st Quarter of 2019, with a 6.1% decrease in New Listings. Putnam was an exception, with a 6.5% increase in New Listings compared to same time last year, while Rockland (+1.8%) and Orange (+2.6%) Counties also saw slight increases.

## Q1 2020

### CLOSED SALES

---

The region saw a 1.9% increase in Closed Sales as compared to 1st Quarter 2019. Ulster stood out with a 19% increase in Closed Sales, while Putnam (+12.3%), Sullivan (+10%), and Greene (+9.2%) Counties also saw increases. Columbia (-7.2%) and Orange (-6.4%) showed decreases in the number of Closed Sales.

## Q1 2020

### HOMES FOR SALE

---

The number of Homes for Sale at the end of 1st Quarter 2020 continued to decline regionally with a 16.9% decrease compared to 1st Quarter 2019. While there were declines in every county within the region, the most significant drops in available inventory at quarter end were seen in Greene (-34.4%), Columbia (-23.4%), Westchester (-22.6%), and Ulster (-20.2%) counties.

## Q1 2020

### MONTHS OF INVENTORY

---

Months of Inventory (Supply) also saw declines across the region when compared to 1st Quarter 2019, most significantly in Greene (-43.8%) and Ulster (-30.4%) Counties. Westchester had the least amount of Supply by the end of 1st Quarter with only 3.6 months of inventory available, while Greene (7.3), Columbia (9.3), and Sullivan (12.6) Counties remained Buyer's Markets.

## Q1 2020

### MEDIAN SALES PRICE

---

As Home Inventory continues to decline in the Hudson Valley region due to Buyer demand, Median Sales Price continues to rise. Every county in the region showed an increase in Median Sales Price over 1st Quarter 2019, with the exception of Greene County which had 3.9% decrease.

The most significant gains were seen in Sullivan County, showing an increase of 26.8% versus same time last year. There were notable price improvements in Orange (+12.6%), Columbia (+11.3%), and Westchester (+11.1%) Counties, as well.

## TOTAL INVENTORY OF HOMES

Q1 2017 - Q1 2020

At the end of 1st Quarter 2020, every county in the Hudson Valley region showed a reduction of available inventory as compared to 1st Quarter 2019. Most notably Greene County, down 52.4% in available inventory, as compared to same time last year, while Columbia (-30.5%), Westchester (-29.2%), and Ulster (-25.3%) also experienced major declines in the number of homes available for the same time period.

While the effects of COVID-19 may have impacted supply for the latter half of March 2020, the region was already showing lower inventory levels at the close of February. Based on the data, the Region was clearly heading towards a busy Spring Market with increased competition amongst Buyers.

# MONTHS OF INVENTORY

## MONTHS OF INVENTORY (SUPPLY) Q1 2017 - Q1 2020

Inventory is a critical indicator for the housing market. The real estate industry considers 6 months of inventory a "Balanced Supply." Fewer than 6 months is considered a "Seller's Market" and more than 6 months of available inventory is considered a "Buyer's Market". In a Seller's Market, lower inventory levels and strong Buyer demand create strong upward pricing pressure resulting in increased home values.

All Counties showed decreases in Months of Inventory as 1st Quarter 2020 came to a close, with notably steep drops - *more than 20% decreases* in Supply - in Greene (-43.8%), Ulster (-30.4%), Columbia (-25.6%), Westchester (-25%), and Dutchess (-22.6%) as compared to 1st Quarter 2019.

Months of Inventory at the end of 1st Quarter 2020 indicated that majority of the Hudson Valley region would be entering a strong Seller's Market for the Spring Real Estate Market. Months Supply in Westchester County (3.6), Rockland (4.3), Orange (4.6), Putnam (4.7), Dutchess and Ulster (4.8), would typically lead to Buyer competition and increased Home Values. While the Northern most parts of the region remained in a Buyer's Market, Greene (7.3), Columbia (9.3), and Sullivan (12.6), also showed reduced inventories available at the end of March as compared to end of 1st Quarter 2019.

## MARKET DATA 2016 - 2020

Source: Hudson Gateway Association of Realtors, 2020 1st Quarter Residential Real Estate Sales Report

Analyzing the real estate market data for two- to four-family homes grants a broader perspective of the real estate market. Multi-family properties may be owner occupied with a tenant or tenants providing additional income to offset the homeowner's housing expenses, or they may be purely for investment. Rental housing is in high demand as single family home values have increased, which has led to increased value for multi-family units, as well.

Rockland County saw the largest percentage increase in multi-family home values with a 46.7% gain in Median Sale Price over same quarter last year and a remarkable a 79.3% gain in median sale price since 2016, which translates to a \$230K rise in home value. Orange County showed the largest percentage change over 5 years, with 228.4% gains in home value since 1st Quarter 2016.

Inventory continues to decline in all counties, resulting in what ordinarily would indicate more upward pricing pressure for multi-family properties for the remainder of 2020. However, due to COVID-19 eviction stays, multi-family properties could see reduced Appraised Values, as missing rents will impact the total value of the properties. Landlords may be heavily impacted as the ripple effect of the reduced rental income and extended eviction terms could impair their ability to pay mortgages putting them in danger of default.

# HUDSON VALLEY REGIONAL HOUSING MARKET REPORT

## COVID-19 IMPACTS ON THE REAL ESTATE PROCESS

The real estate industry is based on close, person-to-person business activities including home tours with Realtors, Closings in Attorneys' offices, as well as numerous exchanges with Home Inspectors and Appraisers, as well as between buyers and sellers.

Empire State Development adjusted the list of essential business activity to include residential and commercial showings along with back office real estate work, appraisal services and home inspections are essential real estate functions effective April 1, 2020:

Essential Businesses must continue to comply with the guidance and directives for maintaining a clean and safe work environment issued by the Department of Health and every business, even if essential, is strongly urged to maintain social distance to the extent possible. The following functions of real estate and/or realtors (sic) are considered essential: Residential home and commercial office showings; home inspections; and residential appraisers. Back-office real estate work is deemed essential, but please utilize telecommuting or work from home procedures to the maximum extent possible.

### How is this impacting Real Estate Transactions in the Short Term?

**Virtual Showings** - although recent NYS Executive Orders permitted Realtors to conduct home tours - the manner in which it is done has changed. Current guidelines allow Realtors to offer virtual home tours if the Sellers will allow access, but Realtors may not meet with Buyers or Sellers in person.

**Home Inspections** - The International Association of Certified Home Inspectors acted quickly to offer a five-hour COVID-19 Safety Certification so that Homes Inspectors could understand and minimize the risks of COVID-19 while continuing to complete Home

Inspections during the PAUSE. Home Inspections are now generally conducted without Buyers present and then wrapped up virtually via video so that the Home Inspector can convey summary of findings.

**Contracts & Closings** - Due to social distancing requirements, closings have been challenging for Attorneys, Title Companies, Realtors, Lenders, and Buyers and Sellers. New York State has allowed Virtual Notary Services and many Attorneys are conducting their Contract reviews by phone or video chat. For Closings, Attorneys and Lenders have devised ways to minimize contact between parties, including pre-signing documents, offering staggered schedules for signing parties and even drive-thru closings.

There are uncertain times ahead for the real estate market. The sales volume is likely to continue to decline and prices may be stagnant in the short term. However, interest rates are extraordinarily low, many buyers are still working, and the Hudson Valley is likely to see market pressure from the NYC metropolitan area. The ability to work from home will also play a part in the demand for housing in the Hudson Valley.
